

VENTURE STUDIO

Driving a culture of innovation

OUR WORK IN 2024

Prashanth Kumar Duggishetti
Founder & CEO

AI, Robotics, Software, and DevOps. SaaS specialist.

Cofounded Dycap Media Solutions, a robotics company known for cutting-edge products, and an early employee at Velo3D, the makers of 3D printers for SpaceX and NASA.

Ankur Bagchi
Founder & COO

Product, design and marketing. Consumer & social specialist.

Founding designer at a fintech startup acquired by Fiserv. Led product design at Dil Mil, the world's largest dating app for Indians. Advisor with multiple social/dating apps.

LEADERSHIP

Services

WHAT WE DO

Autonomous AI Agents

AI solutions that run on autopilot

Training & finetuning

Build specialized agents for any domain, from scratch.

Chatbots & caller agents

Agents you can text, or speak with. Specialized for specific domains.

Long-term memory

Give your AI unlimited context for every conversation.

Multi-agent systems

Automate complex workflows with multiple AI agents.

Data Acquisition & Management

In the age of ML, data is the new oil

Data Scraping

Acquiring data en-masse from various sources.

Homogenization

Converting data to a form that AI can be trained with.

Warehousing

Structured and efficient storage and retrieval.

Synthetic data creation

Creating large custom datasets to train AI on specialized tasks.

Development

Software of every kind, built to scale

Website Development

Build landing pages, e-shops or your own web product.

App Development

Build a slick app across both iOS and Android in record time.

CTO as a Service

Get help with architecture, tech stacks or anything else.

Scaling to a Million

Scale your product to handle millions of customers.

Product Design

Building beautiful products

User Research

What users say is often not what they mean. Dig for truth.

Streamlining & Wireframing

Scrap what's not needed, grab what is. Put the M and V in MVP.

Logo & Branding

Define your niche. Then redefine it.

App & Website Design

Gorgeous high-fidelity designs for every platform.

What they're saying

TESTIMONIALS

Working with Ellenox is like adding to the founding team. Prashanth & Ankur bring a level of experience and care that you only get from co-founders. Great to have on your side during the critical early years of your startup.

Bryan Lord
Serial Entrepreneur

Ellenox did all of Clockout's designs. Social apps are the hardest to get right, but they really did! Ankur went beyond in providing guidance on growth, analytics and all the little pieces that are easy to overlook during a launch. I've already recommended them to every founder friend I know.

Krishna Dosapati
Founder of Clockout

My business partner, who had the pleasure of working with Ellenox, recommended them with utmost confidence. Their work has been transformative for my business. They designed an app that not only met but exceeded my vision, elevating my company's digital presence. The team is thoughtful, efficient, and a pleasure to work with.

Paul Storie
Founder of Open Links Golf

PARTNER PROJECT

AI Project (NDA)

Contract with a
Fortune 50 company

Enterprise-scale contract

Not live yet

Running a pilot project with a fortune 50 company to optimize operations for multiple large call centers across the US.

- Analyzed 10k+ calls to generate reports and fine tune AI agents on best practices.
- Building a multi-purpose caller agent to autonomously handle entire conversations in natural language.

PARTNER COMPANY

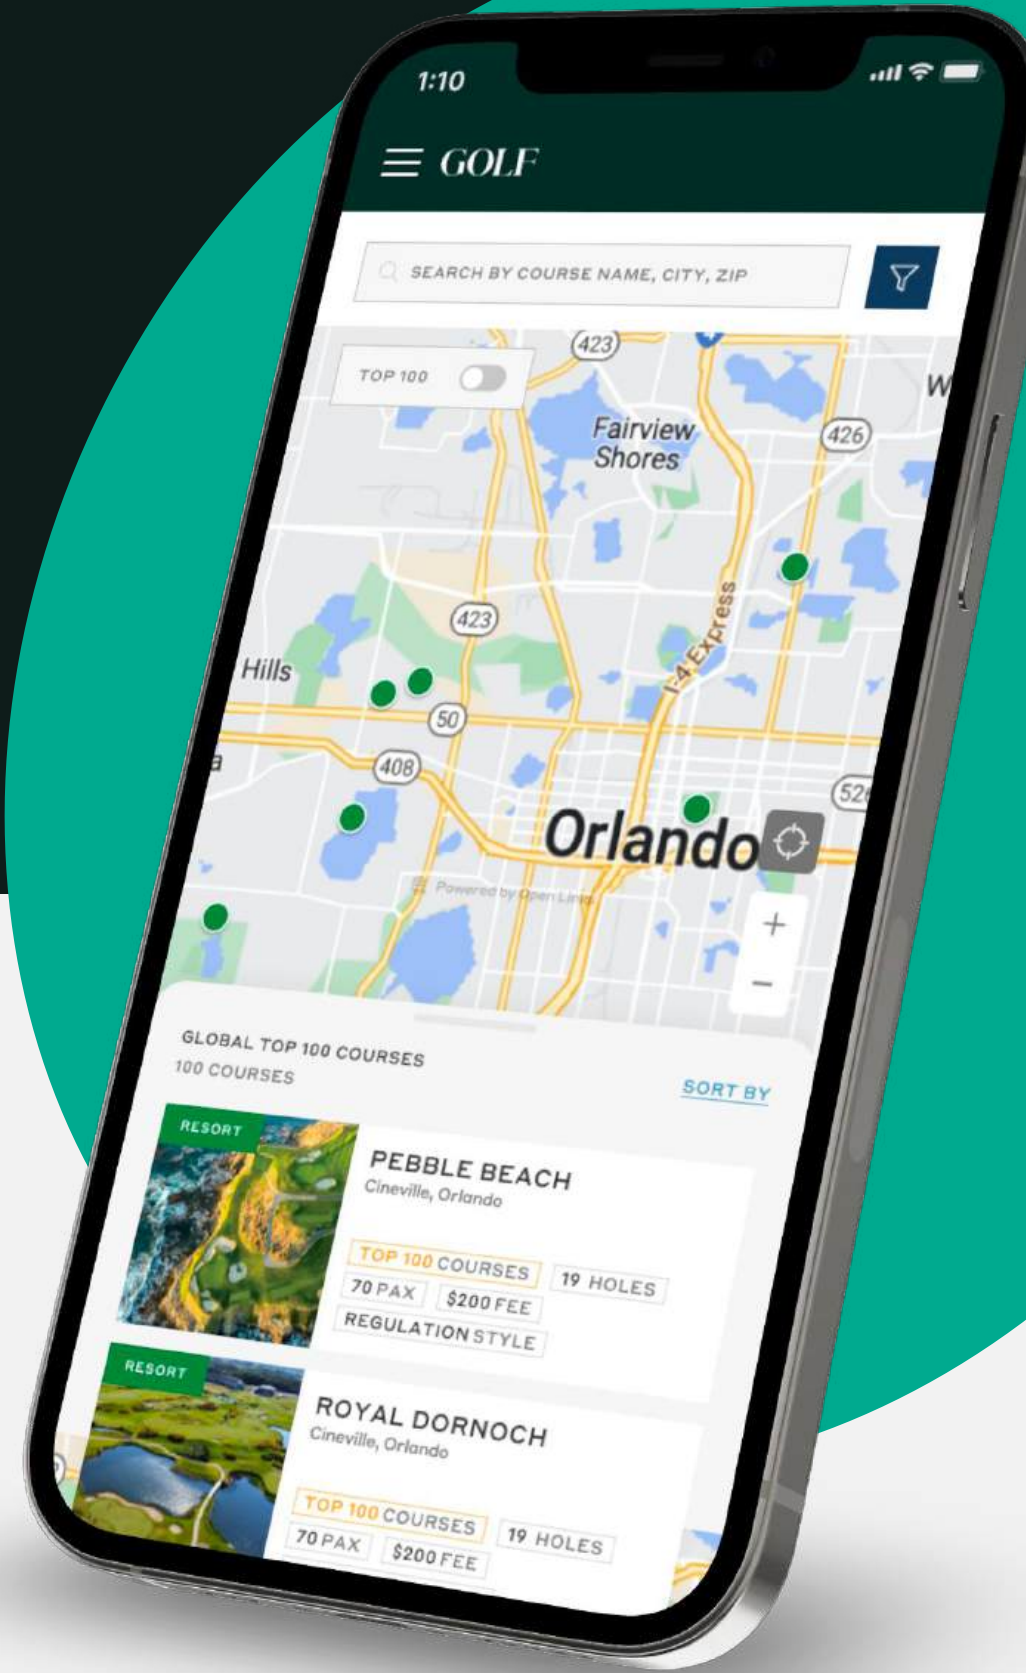

GOLF.com

The world's largest
golf publication

3.5M monthly users

Built a live tool for GOLF.com users to find and book from over 15,000+ golf courses from around the world.

- Scraped thousands of golf course websites to create a database of every course along with booking links.
- Used AI to generate accurate course descriptions and create a recommendation engine for new users.
- Built a web map that loads in thousands of courses at a time, scaled to millions of users.

GuidingPatients

Finding after-hospital care

\$250k ARR

Built a website for US patients to find care places after their hospital stays.

- Scraped, cleaned and warehoused data on 90% of all after-care providers in the US.
- Designed a recommender system for patients based on budget, distance and severity of illness.
- Currently onboarding multiple major hospital chains with a projected ARR in the \$5M+ range.
